- 2. Citations and explanations (Rule 70.7)
 - Each of the search report citations describes a method and a device according to the preambles of the respective independent claims.

In this prior art, the air or fuel supply is used as a controlled variable of the drive unit.

The use of the injection timing or the gear ratio as a controlled variable of the drive unit is without precedent in the searched prior art.

Claims 1 and 18 therefore appear to meet the requirements of PCT Article 33(2) to (4) in light of the searched prior art.

Claims 2 to 17 are dependent on claim 1 and therefore also meet the PCT requirements for novelty and inventive step.

Box No. VII Certain defects in the international application

The following defects in the form or contents of the international application have been noted:

- 1. Contrary to PCT Rule 5.1(a)(ii), the description does not indicate the relevant prior art disclosed in the documents cited in the search report or these documents themselves.
- 2. The description is not in line with the present claims (PCT Rule 5.1(a)(iii)).

International application No. PCT/EP2004/053619

Box No. VIII	Certain observations on the international application

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made: The reference in claim 12 to the air supply and fuel supply makes the claim unclear (PCT Article 6).
